Quantum GoProtect 7.0.497.1 Release Notes

Product:
Quantum GoProtect 7.0.497.1

Release Number:
7.0.497.1

Release Date:
Jan 2014

RELEASE SUMMARY

This document contains the release notes for all release candidates and production versions of Quantum GoProtect 7.0.497.1 software.

WHAT'S NEW

Below is a list of the enhancements that have been added to Quantum GoProtect 7.0.497.1.

Enhanced Deduplication

- Innovative patented technology for improving deduplication ratios on large dynamic files like Exchange and SQL databases, substantially reducing backup times.

Performance Improvements

- Allow file system and computer system protection plans to run with multiple processors on every run

RESOLVED ISSUES

A released build can have one or more reported issues resolved. Below is the list of issues that have been resolved in each publicly released build.

Resolved in build 7.0.497.1:

- Allow for purchase of upgrades to 8.x releases from previous versions of software based on RDX Dock manufacturing date

INSTALLATION and UPGRADE INSTRUCTIONS

1. Download Quantum GoProtect 7.0.497.1 to a folder on your hard drive, and make note of the location of the folder.
2. Open the folder and double-click QuantumGoProtect_7_0_497_1.exe to begin the installation.
3. Follow the installation wizard prompts to completion.
