Purpose of This Release

The DXi 4.9 Software release supports DXi4800, DXi9000/9100, and DXi V5000 disk backup systems.

1 Note: This release was scanned for vulnerabilities using Nessus® for vulnerability risk management, as part of Quantum's Quality Assurance (QA) process. The release code build was validated as secure.

What's New in DXi 4.9?

This software release features the following new features and updates:

- DXi Cloud Share DXi Cloud Share is a feature that is available in DXi Software 4.9 and above. Cloud Share allows DXi4800 and DXi9000/91000 systems to store de-duplicated backup data sets to any S3 compliant public or private cloud; providing up to 70 times more efficient use of cloud storage space. DXi4800 appliances must be sized at 45 TB or greater to enable Cloud Share (96 GB total memory is required for Cloud Share, which is included in a DXi4800 45 TB or larger system).
- RestAPI Update RestAPI version 1.2.6 is available in this release.
- Independent Software Vendor (ISV) Support ISV support added for Veeam, NetBackup (NBU), and Backup Exec (BUE) OST.
- Various maintenance updates and bug fixes.
- WARNING: Systems currently using DXi Software versions earlier than 4.5.0.3 MUST **UPGRADE TO 4.5.0.3 before upgrading to version 4.9.** In general, Quantum strongly recommends upgrading to the latest version of DXi software before installing capacity upgrades, regardless of the capacity increment.

DXi Password Requirements

- System Users Passwords must be between 8-64 characters, and must include at least one upper case (A-Z), one lowercase (a-z), one number (0-9), and one special character (`~!@#\$%
- IPMI and iDRAC Users Service login passwords must be between 8-20 characters, and must include at least one upper case (A-Z), one lowercase (a-z), one number (0-9), and one special character (`~!@#\$%^&*()-_=+[]{}\|;:'",.<>/? space).

Known Issues

DXi 4.9 Software has the following known issues:

Issue Number	Description
DXE-25942	DART GUI banner does not display full firmware version. DART (DXi Advanced Reporting) GUI does not contain enough space to display the new full firmware version. The firmware version has changed due to use of Git code build methods. The DXi code version can still be obtained from the DART GUI.
DXE-20388	Large DXi with extremely busy non-dedup Shares can cause Health Check and Garbage Collection to slow and use excess memory. Workaround: use dedup enabled shares. (DXi is not meant to be a primary storage device.)
DXE-26006	GUI: Can not return to home page from Disk Usage page. Customers using DXi4800 and ingesting data may be unable to navigate from the <i>GUI Status > Disk Usage</i> page to the GUI Home page. Workaround: Navigate to another GUI page and then navigate to the Home page.
DXE-26043	Netserver is not working properly. Usually this function is used in conjunction with Service to test the network connection from one DXi to another. Netserver is not used for any data storage functionality.
DXE-26082	Status page showed network ports p5p3 and p5p4 down with attention mode after successfully upgrading from 4.6.0-build1 to 4.8.0-build8. There is no functional impact to the DXi. Quantum Service can remove the attention after upgrade.
DXE-26091	CLI: Secure Email: CLI (Command Line Interface) command needs improvement. Parameters and values names are not consistent. No functionality impact. Some inconsistencies and improvements that could be made in a future release.
DXE-27624	Upon upgrade to 4.9.0, a V5000 maybe appear to hang and never reach the "Normal" state. In this case, the user needs to log in to the V5000 desktop and respond to the Select Hardware Profile dialog. It is recommended to select the "Small" profile as it best matches V5000s created before 4.9.0.

DXi Additional Notes

Email Reports

Quantum recommends enabling **Email Reports** after upgrading to DXi 4.9 Software (if not already enabled). When enabled, **Email Reports** periodically sends system configuration and status information to Quantum, including any software upgrades you have installed using the **Software Upgrade Utility**. Quantum Support can use this information to provide a better support experience in the future.

To configure Email Reports:

- Make sure a valid outgoing e-mail server is specified on the Configuration > Notifications > Email
 Server page.
- 2. (Optional) Specify any additional recipients to receive the reports on the **Configuration > Notifications > Email > Email Reports > Recipients** page.
- Make sure a weekly Email Reports schedule is configured on the Configuration > Scheduler
 page. Configure two weekly recurring events: one for Status reports and one for Configuration
 reports.
