

# Quantum Scalar i3 Release Notes

---

<b>Product</b>	Scalar® i3
<b>Firmware Version</b>	235G.GS002
<b>Veeam Tape Server iBlade BaseOS</b>	v1.2.0-3
<b>Scalar LTFS iBlade BaseOS</b>	v1.3.0-6
<b>Supported Web Browsers for WebGUI</b>	Firefox Chrome Microsoft Edge
<b>Date</b>	April 2020

## About This Release

The Scalar i3 235G.GS002 release is a maintenance release. It includes the following:

- [Resolved Issues](#) (bug fixes)

---

## General Information

- After a library firmware upgrade, Quantum recommends that you clear your web browser cache before logging back into the WebGUI.
- If an iBlade is present, Scalar i3 systems with an Internet connection will automatically update and level the iBlade BaseOS FW during a library FW update.

If the Scalar i3 system does not have an Internet connection, you can still update your iBlade BaseOS FW as described on our Documentation Center:

- Go to [www.quantum.com/documentation](http://www.quantum.com/documentation) and select your product.
- Go to **Operate > User Guide > About Devices > Devices BaseOS**. To will see detailed steps on updating iBlade BaseOS FW
- Veeam Tape Server iBlades - If Microsoft Hyper-V or any other hypervisor is installed on the Veeam Tape Server iBlade, the Virtual Machine (VM) Operating System (OS) will not be able to see the blade FC/SAS controller. This will cause the Scalar drives to no longer be visible to the VM OS.
- Bridging and teaming interfaces on the Veeam Tape Server iBlade is not supported and can cause network card issues.
- Some snapshots, logs or RAS tickets are as large as 12 MBs. If you have automated notifications configured for RAS tickets and logs you may not receive them if your email does not allow attachments of this size.
- To help maintain system integrity and for marketing purposes, Quantum regularly collects system information through automatic emails (Scalar Telemetrics). These emails contain configuration and status information only, and do not contain any customer data stored on the system. See [WebGUI Default Settings](#) for information on how to disable telemetrics.
- The Web client places a cookie on the user's computer to provide the last user's credentials upon login. The cookie only collects the user's credentials to facilitate login, and does not collect any other user data.
- Any application or browser connecting over https must support TLS v1.2.
- To help maintain system integrity and for marketing purposes, Quantum regularly collects system information through automatic emails and cloud based telemetric auto support. These emails and auto support telemetric data contain configuration and status information only, and do not contain any customer data stored on the system.

### Email Support

To disable this function:

- 1 Log on to your library.
- 2 Select **Notifications** from the **Navigation** menu.
- 3 Select the check box next to *scalartelemetrics@quantum.com* in the **North Panel**.
- 4 From the **Operation** panel, select **Reports**.
- 5 Click the trash can icon next to **Scalar Telemetry report**.
- 6 Click **Apply**, then **Close**.

### Auto Support

To disable this function:

- 1 Log on to your library.
- 2 Select **Notifications** from the **Navigation** menu.
- 3 Select the check box next to *Auto Support* in the **North Panel**.
- 4 To disable RAS tickets, select **RAS Tickets** From the **Operation** panel.
- 5 De-select the **Enable Auto Support Communication** check box.
- 6 Click **Apply**, then **Close**.
- 7 From the **Operation** panel, select **Reports**.
- 8 Click the trash can icon next to **Scalar Telemetry report**.
- 9 Click **Apply**, then **Close**.

## WebGUI Default Settings

Scalar i3 software is installed with certain default settings. This section outlines those default settings. Review this section to determine if any of the default settings need to be changed to make your library run more effectively.

WebGUI Path	Option	Default Setting
<a href="#">User Access &gt; Settings</a>	Local User Interface (LUI) Access	Open Access
	Admin/User Access: Session Timeout	15 minutes
	Services Access: Enable Remove Access	Indefinite
	Enable Local Service Port Login: Access Window	Indefinite
<a href="#">Notifications &gt; RAS Tickets</a>	Enable RAS Tickets	Enabled
	Severity	All options enabled
<a href="#">Notifications &gt; Reports</a>	Scalar Telemetrics	Once you have an email server configured, telemetrics is enabled for monthly automatic emails. To disable, click the <b>Trash</b> icon.
<a href="#">Library &gt; IE Area</a>	I/E Slots	0 (zero)
<a href="#">Library &gt; Settings</a>	Operational Parameters: Automatic Inventory	Enabled
	Operational Parameters: Library-Assisted Drive Unload	Disabled
	Operational Parameters: Logical Drive Serial Number Addressing	Enabled
	Operational Parameters: Logical System Addressing	Disabled
	IE Assignment Mode: Local UI Assignment	Enabled
<a href="#">System &gt; Notifications</a>	Email Reports / Auto Support	Enabled
<a href="#">System &gt; Settings</a>	Library-Initiated Website Access	Enabled

## Security Scanners

Quantum runs the following Security scanners against the library. No high or critical vulnerabilities were found.

- Nessus Professional v. 8.8.0

## Compatibility and Support

### Encryption Key Management Drive Support

The following table provides the encryption key management drive support.

Encryption Option	IBM LTO-6 (HH)	IBM LTO-7 (HH)	IBM LTO-8 (HH)
Application Managed Encryption	Supported	Supported	Supported
SKM	Requires SKM License	Requires SKM License	Requires SKM License
KMIP Key Manager <sup>1</sup>	Requires EKM License	Requires EKM License	Requires EKM License

<sup>1</sup> - SafeNet, IBM SKLM and Thales encryption key servers are supported KMIP configurations  
It is recommended that Safenet servers be updated to v8.6.0 or greater.

### Firmware Compatibility

For the most up-to-date information on the latest qualified library and drive firmware, please visit: <https://www.quantum.com/serviceandsupport/softwareanddocumentationdownloads/si3/index.aspx>

### SAS Half High (HH) Drives

SAS HH drive types and latest firmware versions are:

SAS HH Drive Types	Latest Firmware Version <sup>1</sup>
IBM LTO-6 (SAS) (HH) 6 Gb <sup>1</sup>	KAJ1
IBM LTO-7 (SAS) (HH) 6 Gb <sup>1</sup>	KAH5
IBM LTO-8 (SAS) (HH) 6 Gb <sup>1</sup>	KAH5

<sup>1</sup>Bundled with 235G library firmware..

## **FC Half High (HH) Drives**

FC HH drive types and latest firmware versions are:

SAS HH Drive Types	Latest Firmware Version
IBM LTO-6 (FC) (HH) 8 Gb <sup>1</sup>	KAJ1
IBM LTO-7 (FC) (HH) 8 Gb <sup>1</sup>	KAH5
IBM LTO-8 (FC) (HH) 8 Gb <sup>1</sup>	KAH5
<sup>1</sup> Bundled with 235G library firmware.	

## **iBlade BaseOS Versions for 235G Library Code**

The following table provides the iBlade BaseOS versions for the 232G.GS002 library code.

iBlade OS	Customer BaseOS Download From Web	iBlade SLFTS Application
Linux	1.3.0-6	2.9.0-7
Windows	1.2.0-3	N/A

## **Tape Drive Driver Versions**

The following table provides the tape drive driver versions.

Drive Manufacturer	OS	Approved Version	Comment
IBM	Linux	3.0.31	Includes APFO & LTO8
IBM	Windows	6.2.6.6	Includes APFO & LTO8
IBM	AIX	13.0.22.0	Includes APFO & LTO8

The latest tape driver versions is located at <https://www.quantum.com/serviceandsupport/softwareanddocumentationdownloads/si3/index.aspx>

## **Software Compatibility**

To view a list of backup software packages which have been tested for interoperability with the Scalar i3 Library, see the Quantum Software Compatibility Guide at <http://www.quantum.com/swcompguide.aspx>.

---

## Resolved Issues

This release of Scalar i3 235G.GS002 firmware has the following resolved issues:

Change Request Number	Service Request Number	Description	Resolution
SQ-700	554687	Incorrect drive WWPN after Logical System Addressing (LSA) enabled.	Fixed.
SQ-701		System humidity incorrectly calculated.	Fixed.
SQ-723		Winblade snapshot issue.	Fixed.

## Known Issues

This release of Scalar i3 235G.GS002 firmware has the following known issues.

Change Request Number	Service Request Number	Description	Workaround
SQ-352 (59543)		Automated RAS ticket notifications that include snapshots are unable to be sent because snapshot file is too large.	Make sure that your email is enabled to receive attachments as large as 12 MB.
62027		Failure occurs when attempted to add drives and slots to a partition.	Wait for a drive to be initialized before attempting to add it to a partition.
62032		Unable to log into the RUI when a demo is running.	Works as designed. All users are logged out when a demo is running.
62230		Restore fails when invalid or corrupt image is used.	Use the restore image as soon as possible to test it. If the image fails, save a different restore image.
65020		Medium Changer Device driver not started after Scalar upgrade, causing Veeam to see Veeam Tape Server iBlade as offline.	Restart the iBlade. In the WebGUI, go to <b>WebGUI &gt; Devices</b> . Select <b>Devices Restart</b> from the right navigation menu.
SQ-556		Veeam updates fail when using Service Port.	Use customer ports for updates.

---

## Documentation

The following reference documents are currently available for the Scalar i3.

Document Number	Document Title
6-68528	<a href="#"><i>Scalar i3 Documentation Center</i></a>
6-68528	<i>SNMP Reference Guide (in Documentation Center)</i>
6-68528	<i>SCSI Reference Guide (in Documentation Center)</i>
6-68528	<i>Web Services API Guide (in Documentation Center)</i>
6-68528	<i>muCommander - Quantum Edition User's Guide (in Documentation Center)</i>
6-67320	<i>Scalar i3 &amp; i6 Open Source Software Licenses</i>
